- **Offshore sea survival.**
- **Breathing apparatus**

Places of work before:

Work for Mari Dive Company in

-EGYPT...	2 years
-INDIA...	8 months
-ABUDAHABY&IRAN....	5 month
-SOUTHAFRICA...	2 month

Work experience

Working in:

- Spool 48"maneuvering for P\L – insert belts – washer install the jacket
- Control the Crain for put baskets tools behind flange
- Maneuvering the spool
- Install cement bags free span correction for P\L
- (Connect – disconnect) pontoons(air tanks) from P\L
- Using wire between 2 flanges
- Insert bolts on 48 " spool flange both side
- Take gape measurements using the hydra tight with jacks and houses connect the circuit start pressure ; resurface jacks
- Using jack hammer under 48 " flange to remove cement
- Install air lift beside the flanges
- Water jet
- Impact
- Wall thickness, cathodic protection & anodes survey.
- Penetration , leg check for rigs
- Visual inspection for 48 " P\L , s pm ,measure diameter
- Cutting the bracket to the conductor guide using v\w cutting torch
- Installation beacons on the sleeper
- Connect-disconnect (anchor wire in L. D .h , flange protector , davits on bow side
- Embossment the distance L.D.H eye to slot clamp
- Embossment to jolliest spool (metrology)
- Work in pipe line 48 " survey – insert sleeper plots in flange
- Contact 48 " spool with pipe line flange and balm
- Attach crane wire to L.D.H (connect-disconnect) tiger winch , sling, wire between 2 flanges
- Video recording, G.V.I – G.V.S , inspection CP-UT for anodes, plat form
- Put sleepers for 48 " PL laying passing over another P\L
- Install stabilizer mattress on P\L
- Work on Rick ship and bring tools , fixed
- Closing hutch put coating at tank ventilation
- Installation anode sleds and anode clamp. different kinds, different size of plat form
- Instilling grout bag under P\L and filling with grouting
- Stinger (check, control valves , hitch , monitor , replace broken pins)
- Risers, conductors, caissons & pumps intakes survey

- General visual inspection for pipelines, tube turns & risers.
- Inspection for crossings & their components (sleepers, chains, shackles, grout bag supports, stabilization mattresses & saddles).
- Mechanical anchors & piles inspection.
- Cathodic protection system & anodes survey and measurements.
- Wall thickness survey using digital thickness devices.
- General maintenance for offshore pipelines & structures.
- Risers replacement & smart flanges installation.
- Pipelines free spans correction using grout mattresses.
- Mechanical anchors repair & refitting.
- Skid anodes installation on flow lines & platforms.
- Anodes retrofitting for offshore structures & S.B.M.S.
- Boat landing fenders & ladders replacement.
- Pipeline repair using smart flanges & mechanical connectors for 10”& 18” flow lines..
- Anodes retrofitting & replacement.
- Mechanical repair for damaged structure members.
- Grouting for the structure legs annulus.
- Supporting of pipelines at the crossings & landfalls using grout mattresses & bags.
- Pipelines repair using “PLIDCO” sleeves & clamps.
- Maintenance & survey for GUPCO Sea berths buoys & hoses.
- Conductors rigging & installation.
- Bottom walk survey for Rig moves & penetration check after the final approach.
- S.P.M. maintenance & hoses replacement.
- Splash zone coating using epoxy coating .
- Underwater cutting using Brocco gear for conductors & platform legs.
